It is obvious without any doubt that the conditions on Big Horn lake are the result of years of gross mismanagement of Wyoming's water. Based on this fact, it is my suggestion to all parties involved that the Attorney General for the State of Wyoming needs to become a part of this investigation. Once it is determined exactly what percentage of this water belongs to Montana, I believe the Bureau of Reclamation should receive a bill for that portion of water that Montana was not entitled to.

Once all of the dust settles on this end of Big Horn Lake as the result of proper management, I hope that all parties involved receive their fair share of the water.

Thank You.
